1 Comments: [While I respect the work that is being completed and am sure that the people working on the project are professional I cannot support this project.

Nevada does not have any nuclear power facilities. Further Nevada has more then suported the needs of the country as it pertains to nuclear weapons development and research.]

2 [The current EIS does not put my fears to rest as to the transportation of such large amounts on waste thru the county. As a member of a local town board and a law enforcement professional I cannot see how such items can be moved thru the community on either I-15 opr US93/95 without some type of accident ever occurring.]

Please register my opposition to this project.
